

HybridNeuro Hub (HNN)

is a pan-European initiative connecting science, healthcare, industry, and end-users in muscle physiology, neural engineering, muscle-brain-computer interface technologies, and behavior assessment.

> Clinical Excellence

Transforming research into therapies that enhance health and well-being.

> Technological Innovation

Pioneering advanced brain, muscle and neural interface technologies.

> Knowledge Transfer

Bridging laboratory-scale to piloting-scale set-ups.

> Regulation

Ensuring compliance with legal, safety, and ethical standards.

> Artificial Intelligence supported models

Leveraging AI to create smarter, data-driven solutions.

HybridNeuro Hub (HNN) is supported by funding from the European Union's Horizon Europe programme and UKRI scheme The Hub is a result of the HybridNeuro project (GA No. 1010793392, No. 10052152).
