

HybridNeuro Hub is a European initiative that pursues the partnership between Clinicians, Industry, and Research Centers in muscular and neuroscience rehabilitation.

HybridNeuro HUB offers benefits to:

Clinicians: access to cutting-edge research and technologies for more effective patient care.

Industry: explore funding opportunities to foster innovation and product development.

Researchers: integrate in a unique ecosystem to accelerate the research findings into practical applications.

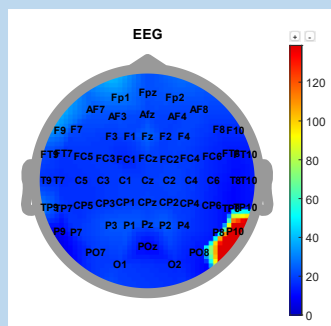

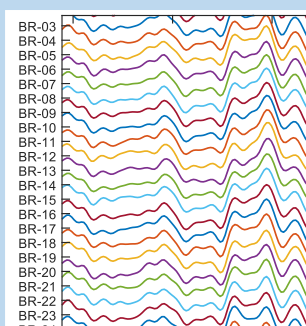

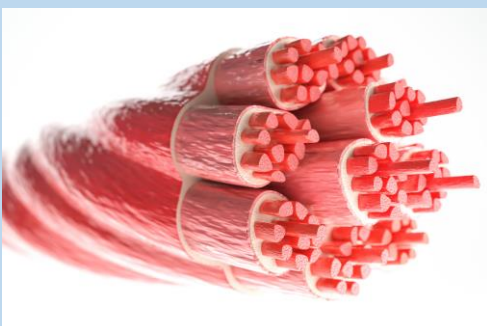

HybridNeuro Hub (HNH) brings together experts in muscle and neural interfaces field to improve neurorehabilitation.

<https://hybridneuro.feri.um.si/hub/registration.html>

Mission: HybridNeuro is dedicated to pioneering breakthroughs in neural interfaces and muscle rehabilitation to enhance the quality of life for individuals with neurological conditions.

Vision: Our vision at HybridNeuro is a future where individuals with neurological conditions will get access to state-of-the-art treatments and technologies that will empower them to regain control of their bodies and live fulfilling lives.

Values: We are committed to developing scientific and technological **Innovative** solutions for challenges of neural interfaces and muscle rehabilitation; to fostering **Collaboration** by bringing together clinicians, companies, researchers, and patients to exchange knowledge and ideas; to showing integrity and **Ethical Conduct** the core of our values; to be **Patient-Centric** by developing solutions to improve patient's quality of life by actively seeking their input and feedback to know their needs; to commit dissemination of **Education and Awareness** for the general public, clinicians, and researchers about the potential of neural interfaces and muscle rehabilitation.
